

Dear Principal, Guidance Counsellor, Science Teacher,

We are writing to introduce our Medical Poland Admissions Office and a number of international students who are studying medical disciplines through English in Poland. We would like to **invite you to our upcoming Open Days, offer your school a live online presentation and invite you and your students to a trip to Poland and an opportunity to visit Polish universities** in April.

Medical Poland has been helping international students since 2013 in gaining access to Polish medical schools which deliver programmes through English. We have been working with guidance counsellors, teachers, public health authorities in Ireland, the Irish Embassy in Warsaw and Polish Embassies in Dublin and London, to inform international students about the options available to them at 14 public medical and veterinary universities teaching through English.

The [21st March Medical Poland Medical Sciences Open Day](#) is an opportunity to learn about studying medicine, dentistry, nursing and veterinary medicine, whilst the 28th March Nursing Open Day will focus on one discipline and will have special guests - students and graduates. Polish third level education through the English language landscape will be discussed, as well as entry requirements and students' accounts.

School presentation: We would also like to deliver a live online presentation to your 6th form students. We believe that a number of your high achieving school leavers will choose medical careers and may be interested in pursuing programmes delivered through English in Poland similarly to hundreds of Irish and British students who are already pursuing their degrees. Feel free to visit [our Facebook page](#) to see recordings of some of the past sessions and [our YouTube channel](#) for student, parent and teacher testimonials.

A trip to visit Med and Vet schools: We have noted an increased interest among school guidance counsellors, career advisors and science teachers in visiting the facilities together with their students, hence we are facilitating such a trip - a tour of 4 universities from 19th to 21st April (more details attached).

We will gladly provide any additional information about Medical Poland or Polish higher education via e-mail or telephone on +44 2033 68 88 48 and would like to arrange a meeting with your careers advisor either online or in person on 21st March.

Faithfully yours,

Artur Banaszekiewicz

Head of Student Counselling

Adam Krawczyk
