

BAE Systems Maritime and Land Defence Solutions

Virtual work experience

Monday 9 – 13 November 2026

Do you know a young person who would benefit from gaining valuable insight into the world of engineering and business?

Our **five-day virtual work experience programme** offers an exciting introduction to early careers opportunities at BAE Systems, one of the world's leading defence, aerospace and security organisations. With opportunities spanning engineering and business services across sites throughout the UK, participants will gain a real understanding of what a future career with BAE Systems could look like.

Designed for students aged **14-18**, the programme takes participants through a real-world engineering challenge, combining:

- Live interactive learning sessions
- Group discussions and collaborative activities
- Independent research tasks
- Q&A sessions with apprentices and experienced professionals

Throughout the week, students will work on an engineering project before presenting their solutions to a panel of BAE Systems ambassadors on the final day.

The programme gives young people the opportunity to:

- Gain a behind-the-scenes insight into BAE Systems and the work we do
- Learn about our innovative products, technologies and services
- Develop key employability skills, build confidence and explore future career pathways
- Connect with apprentices, graduates and industry professionals

Details on how to apply in Careers Google Classroom

Before you apply, you MUST speak to Ms Jupp or Ms Shakya first
