The Mountbatten School

February 2022

Dear Parent/Carer

Your child's Human Papillomavirus (HPV) vaccination is now due.

HPV is given as part of the routine school age immunisation programme, administered in two doses. The first dose is offered in the spring/summer of 2022 and the second dose in the spring/summer of 2023. It is offered at this age because the vaccination works best if received before an infection occurs.
HPV vaccine is not routinely available from your GP.

We are due to visit your child's school on *17/03/2022*. Please submit your form by 3pm *on 10/03/2022* to ensure your child receives their vaccination.

Click on the following link to access the online consent form

https://www.southernhealthimmunisations.co.uk/forms/HPV

The unique code for your child's school is *SH136640* This code must be manually typed in.

When you have submitted your form, you will receive a confirmation email. This may go into your "junk" folder. If you do not receive the email, contact the school who can verify whether a form has been submitted.

If your child is absent from school on the day of their vaccination the School Age Immunisation Service will offer a further opportunity for them to receive the vaccine.

How can I find out more?
Further information about HPV vaccine can be found at www.nhs.uk/hpv

Following guidance from NHS England, the immunisation programmes are continuing to be delivered in schools. All staff will be wearing masks at the session.

If you would like to speak to a nurse about the vaccination, please contact the immunisation team on the contact details above.

Yours faithfully

School age Immunisation Team
